

## Botany: As a GE Subject

Botany is a popular choice in the science stream due to good future career opportunities. The world will always require botanists, and the study of plant science will always be important, because plants are crucial components of our planet's biodiversity. Plant biology is associated with food security in this planet. There are plenty of opportunities in Research & Development in our country and abroad.

- Students who opt Botany as a GE subject always get benefits in CSIR-UGC NET (Life Science) & similar types of Tests.
- Botany as an optional paper is a popular choice in PSC/UPSC Exams
- The importance of botany in daily life is seen in industries as diverse as agriculture, horticulture, genetic engineering and health care. Lots of job opportunities in these fields.
